

OVER 10 YEARS
CARBON ZERO

OUR IMPACT

We are on a journey to eliminate any negative impact we have on the environment. Since 2008, we've been working with a carbon management company to calculate and offset our corporate carbon footprint in order to become carbon zero.

As a company, we chose to support the Kenyan Energy Efficient Stove Project. The project builds energy saving cooking stoves for villages in Kenya. Resulting in a 50% reduction in the need for firewood, preventing carbon from being emitted from the stoves. In addition to carbon prevention it also provides families with a cost and time effective method to cook with.

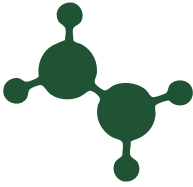

The reduced need for firewood helps to prevent deforestation, in turn benefiting the wildlife in terms of their habitat. It is also a healthier method of cooking as it reduces indoor smoke by half. Indoor smoke is a serious problem in Africa and is dubbed the "kitchen killer", as it is responsible for 1.6 million deaths in the country every year.

OUR IMPACT

We are proud of the impact that we have achieved so far:

5,982tCO2e
Carbon Saved

4,863 Tonnes
Wood Saved

1,863
Number of Stoves Built

2,423
Number of Families Helped

10,062
Total People Impacted

5,776
Total Children Impacted

1,863
Number of Elderly Helped

15,652 Days
Working time saved

2,739
Total Respiratory Improved Cases

Through the Kenyan Stove project, we not only manage to offset our carbon footprint, but also deliver on 11 of the 17 UN Sustainable Development Goals. With this support it enables us to educate our employees, visitors and customers on how they can get involved and also work towards achieving a better and more sustainable future for all.

HOW DOES CARBON OFFSETTING WORK?

Our team can work with you throughout the process and help with any questions you may have. Below is an example of the process that you would follow:

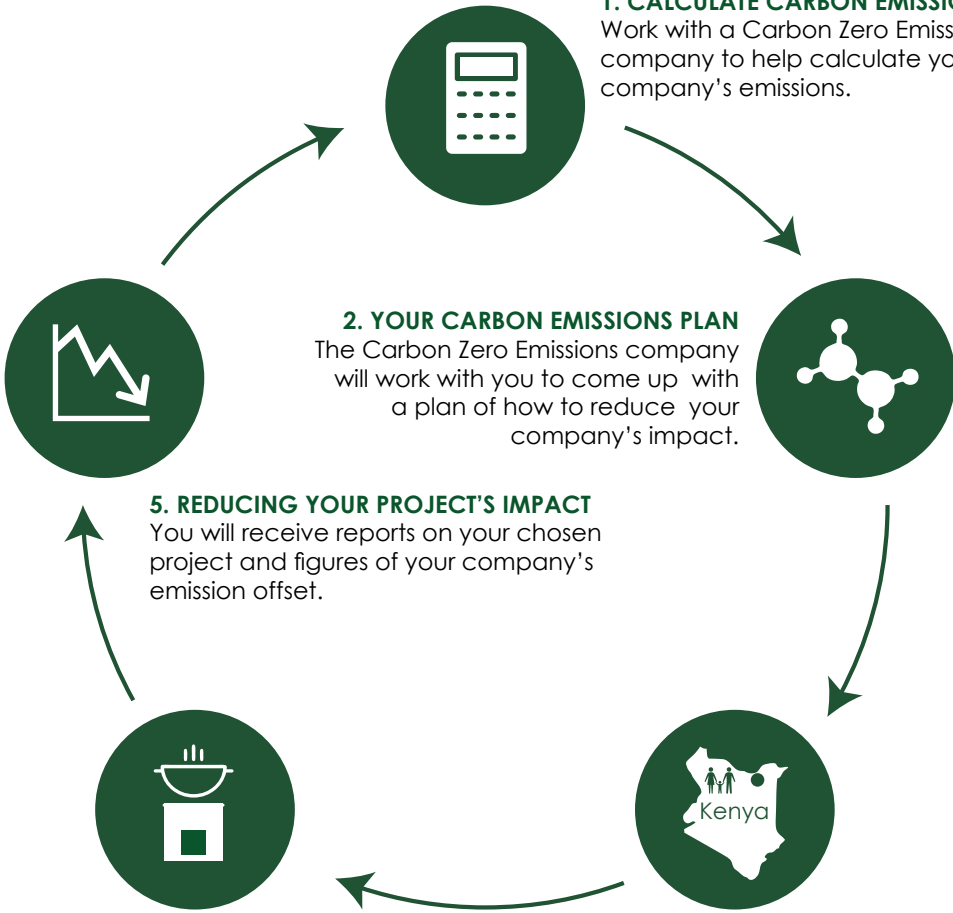

1. CALCULATE CARBON EMISSIONS
Work with a Carbon Zero Emissions company to help calculate your company's emissions.

2. YOUR CARBON EMISSIONS PLAN
The Carbon Zero Emissions company will work with you to come up with a plan of how to reduce your company's impact.

5. REDUCING YOUR PROJECT'S IMPACT
You will receive reports on your chosen project and figures of your company's emission offset.

4. LEARN ABOUT YOUR PROJECT
The company will help you learn about the project and the possible impact that you can achieve.

3. CHOOSE THE RIGHT PROJECT FOR YOU
Once you have calculated your carbon footprint, you will be able to pick a project which is right for you and your business.

► HOW TO BECOME A CARBON ZERO COMPANY

The carbon management company that we work with deal directly with the end users, with all offsetting costs going straight back into the community. With a range of projects across the globe, you can find a project that best suits your company ethos and values.

Organisations have realised over the years of how their carbon footprint can effect the globe. Unfortunately with people in the worst struggling communities being the ones that are effected first (by our actions).

With Corporate Social Responsibility being at the forefront of many organisation's minds, this is the perfect way to offset your carbon footprint and also give back.

We can help you with any requirement large or small. Whether you want to make a specific vending operation carbon zero, or make your whole company carbon zero.
